

Climate of the nation - National Report

Prepared for The Climate Institute April 2017

Methodology

Methodology

This study was conducted on an online permission-based panel between Wednesday 12 April and Wednesday 19 April 2017.

The sample was 2,660 Australians aged 18 years and older, distributed across Australia as follows:

> NSW	600
> Victoria	600
> Queensland	600
> South Australia	400
> Western Australia	400
> Tasmania/ACT/NT	60

Age, gender and area quotas were applied to the sample.

Following the completion of interviewing, the data was weighted by age, gender and area to reflect the latest ABS population estimates.

Main Findings

Where do they get their news from

“Where do you typically get your news from?” QB2

- The most commonly mentioned news source is ‘Commercial TV News’ with half (51%) of Australians saying that this is where they typically get their news from.
- The next most common news sources are: ABC TV News (33%), social media (31%), news.com.au (25%). Other sources are less than 15% each.
- Millennials (ages 18-34 years) most commonly use social media (47%), then commercial TV News (33%), news.com.au (29%) and ABC TV News (22%).
- Among Australians who are very concerned about climate change, they are equally as likely to get their news from ABC TV News (45%) as Commercial TV News (45%), with 34% getting news from social media and 27% from news.com.au

Where do they hear about climate change

“...Where do you typically hear about climate change?” QB3

- The most commonly mentioned news source for hearing about climate change is ‘Commercial TV News’ with 41% of Australians saying this.
- The next most common news sources for hearing about climate change are: ABC TV News (30%), social media (25%), news.com.au (15%). Other sources are less than 15% each.
- Millennials (ages 18-34 years) most commonly get climate change news from social media (40%), then commercial TV News (28%), ABC TV News (20%), and news.com.au (18%).
- Among Australians who are very concerned about climate change, they are most likely to hear about climate change from ABC TV News (42%), ahead of Commercial TV News (37%), with 34% getting news from social media, 20% from SBS TV News, 19% from ABC radio and 16% from news.com.au

How trustworthy is each media outlet for reporting **climate change** issues

“How trustworthy do you think each of these media outlets are (...in being unbiased..) when reporting on climate change?” QB4

- The most commonly mentioned news source as a trustworthy source when reporting on climate change is ‘ABC TV News’ with 66% of Australians saying this.
- This is closely followed by: ABC Radio (59%), SBS TV News (59%), ABC Radio National (56%). Other sources are mentioned by less than 50% each (Commercial TV News (48%), Social media (16%).
- Millennials (ages 18-34 years) most commonly mention: ABC TV News (64%) SBS TV News (62%), ABC Radio (60%), ABC Radio National (56%). Other sources are mentioned by less than 50% each (Commercial TV News (48%), Social media (26%).
- Among Australians who are very concerned about climate change, they most commonly mention: ABC TV News (79%), ahead of SBS TV News (75%), ABC radio (73%), ABC Radio National (68%). SBS Radio (64%). Commercial TV News is mentioned by 48%, and news.com.au by 42%.

How trustworthy is each media outlet for reporting **energy** issues

“How trustworthy do you think each of these media outlets are (...in being unbiased..) when reporting on energy issues?” QB5

- The most commonly mentioned news source as a trustworthy source when reporting on energy issues is ‘ABC TV News’ with 60% of Australians saying this.
- This is followed by: ABC Radio (55%), SBS TV News (53%), ABC Radio National (52%). Other sources are mentioned by less than 50% each (Commercial TV News (44%), Social media (16%).
- Millennials (ages 18-34 years) most commonly mention: ABC TV News (56%) SBS TV News (56%), ABC Radio (53%), SBS Radio (51%). Other sources are mentioned by less than 50% each (Commercial TV News (44%), Social media (25%).
- Among Australians who are very concerned about climate change, they most commonly mention: ABC TV News (76%), ahead of SBS TV News (71%), ABC radio (70%), ABC Radio National (67%). SBS Radio (61%). Commercial TV News is mentioned by 42%, and news.com.au by 40%.
- Australians show very little differentiation between energy issues and climate change news in relation to news channels that they find trustworthy.

Concern about climate change

“How concerned are you about climate change?” QB6

- 66% of Australians are concerned about climate change, including 24% who are ‘very concerned’ (in 2016 72% concerned including 24% ‘very concerned’).
- Millennials (18-34 years) age more concerned about climate change than Generation X or Baby Boomers (71% compared to 66% Gen X, 66% Baby Boomers, 56% ages 65+ years).
- Concern about climate change is greater among those with political leanings towards The Greens (92%) and Labor (76%) compared to 58% among The Liberals and 44% among both Nationals or One Nation.
- Overall:
 - > 24% Very concerned
 - > 42% Fairly concerned
 - > 22% Not very concerned
 - > 9% Not at all concerned
 - > 3% Don’t know

Do Australians believe that climate change is occurring

“Which one of the following statements is closest to your opinion?” QB7

- 71% of Australians of Australians believe that climate change is occurring. 75% in NSW believe that climate change is occurring (up from 73% in 2016).
- 6% do not think that climate change is occurring.
- 15% are unsure.

“To what degree do you think we are experiencing the impacts of climate change in Australia?” QB8

- 73% believe that we are experiencing climate change.
- 33% say that we are experiencing ‘a lot’ of climate change
- Only 6% say that we are not experiencing climate change, and 3% don’t know

What are perceived as the causes of climate change

“Which one of the following statements is closest to your opinion?” QB9

- Half (50%) of Australians believe that humans are the main cause of climate change.
- 33% believe that natural causes are the main cause of climate change
- 13% Don't know and 4% don't believe that climate change is happening at all

“What do you think the average Australian believes to be the main cause of climate change?” QB10

- 24% of Australians believe that the average Australian doesn't know the cause of climate change (only 13% themselves 'don't know').
- 20% believe that the average Australian thinks that natural cycles are the main cause of climate change, and that 9% don't believe that climate change is happening at all.
- 49% believe that the average Australian thinks that humans are the main cause of climate change.

Beliefs about climate change in Australia

“For each of the following statements about climate change please indicate the extent that you agree or disagree?” QB11

Statements	Disagree	Neutral	Agree
The seriousness of climate change is exaggerated	43	17	33
I trust the science that the climate is changing due to human activities	18	18	57
There are too many conflicting opinions for the public to be sure about claims made around climate change	21	17	57
Ignoring climate change is simply not an answer as it increases the risk of the situation getting worse	11	16	67
Further extreme weather as a result of climate change will cause adverse economic impacts for Australia	10	16	66
Further extreme weather as a result of climate change will cause cost of living rises in Australia, such as increased food prices and higher home insurance premiums	9	14	69

Beliefs about climate change in Australia

“For each of the following statements about climate change please indicate the extent that you agree or disagree?” QB11

- A. The view that ‘the seriousness of climate change is exaggerated’ is more agreed with by those leaning toward The Coalition (49%) or One Nation (56%) than Labor (26%) or Greens (11%).
- D. The view that ‘ignoring climate change is simply not an answer...’ is more agreed with by those leaning toward Labor (77%), The Liberals (61%) and Greens (87%) more so than Nationals (45%) or One Nation (43%).

“How concerned are you that climate change will result in the following outcomes?” QB12

- Australians are most concerned about the destruction of the Great Barrier Reef with 41% ‘very concerned’ and a further 33% ‘fairly concerned’. Only 7% are ‘not at all concerned’.
- Similarly people are very concerned about more droughts and flooding affecting crop production and food supply (36% very concerned, 38% fairly concerned).

Concern about climate change outcomes in Australia

“How concerned are you that climate change will result in the following outcomes?” QB12

Preferred energy sources in Australia

“Please rank the following energy sources for Australia to use ?” QB13

- Solar is by far Australians’ most preferred energy source with 49% saying that it is their **most preferred** source, well ahead of Hydro (dams) (11%) and Wind power (10%) which were the next ranked ‘most preferred sources’ *
- When Australians’ **top three ranked sources** are considered Solar remains the most preferred source, followed by Wind and Hydro. Only 18% place Coal in one of their top three preferred sources.
- Overall, the sources of energy which ranked in Australians’ **top three preference** * are :
 - > 79% Solar
 - > 62% Wind
 - > 50% Hydro (dams)
 - > 26% Gas (21% in Queensland, 39% in SA)
 - > 26% Tidal/Wave
 - > 20% Nuclear (26% male, 13% female)
 - > 19% Geothermal
 - > 18% Coal (21% NSW, 21% QLD, 8% WA)

* Excludes 13% who ‘Don’t Know’

Pumped Hydro

“Have you heard of the term ‘pumped hydro’?” QB14

- 22% of Australians have heard of the term ‘pumped hydro’ (30% in SA , 16% in VIC)

“The use of renewables to generate energy in Australia is growing, however coal is currently the dominant source. There is much discussion about how our energy will be supplied in the future. With this in mind, which one of the following combinations do you think is best to meet Australia’s future energy needs?” QB15 (plus a description of ‘pumped hydro’)

- 58% of Australians prefer ‘Clean energy renewables’ to meet Australia’s future energy needs.
- 38% prefer ‘mixed energy renewables’ supported by gas and/or coal
- Only 4% say that coal and gas only are best to meet Australia’s future energy needs.

Statements on coal fired power generation

“For each of the following statements about climate change please indicate the extent that you agree or disagree?” QB16

- Australians firmly believe (72%) that the Government needs to implement a plan to ensure the orderly closure of old coal plants and their replacement of clean energy.
- Australians disagree that the market and energy companies should be the ones to decide when old coal plants are closed (42% disagree, 27% agree).
- The majority agree that Australia’s current coal fired generation will need to be closed and replaced with clean alternatives (59% agree, 15% disagree, 17% are neutral) (82% of those very concerned about climate change agree, including 55% who strongly agree).

Replacing coal fired power generation

“Over time, Australia's coal-fired power stations are going to be replaced with cleaner technology, like wind and solar. This will involve costs - for new generation, site remediation and redundancies. Which one of the following do you prefer?” QB17

- Almost two in three (65%) of Australians prefer that coal-fired power stations be phased out gradually so that we can manage the costs over time.
- The phasing out of coal power gradually is broadly accepted by supporters of all the main political parties (68% Labor, 66% The Coalition, 59% One Nation, 57% Greens).
- 19% of Australians want coal-fired power stations phased out as soon as possible, even if it costs more in the short term (35% among those who are very concerned about climate change).
- 10% say to keep coal-fired power running for as long as possible (15% of One Nation supporters, 12% NSW).
- 6% say that coal-fired power does not need to be replaced by other sources such as wind or solar power

When should Australia end coal fired power generation

“When do you think that Australia should completely end coal fired power generation?” QB18

- The majority of Australians want Australian to completely end coal-fired power within the next twenty years (61%). This includes 30% who want it completely ended within 10 years.
- 16% say that coal-fired power should never be completely phased out (23% in QLD say this).

Awareness of Paris Agreement 2015

“Are you aware of the Paris Agreement - the international agreement reached at the UN International Climate Conference in Paris, at the end of 2015, where Australia and 196 other countries agreed to limit global warming to 1.5-2°C above pre-industrial levels by reducing emissions to net zero?” QB19

- Barely half (46%) are aware of the Paris Agreement reached at the UN Climate conference Paris 2015 when prompted by the name.
- Older Australians are more aware of the Paris Agreement (63% of ages 65+ years, compared to 38% of Millennials/18-34 years).

Actions Australia should take with regard to climate change

“To what extent do you agree, or disagree with the following statements?” QB20

Australians are firmly against waiting for USA, China or other countries to act before Australia acts on climate change.

- 52% disagree that Australia should not act on climate change until other major emitters like USA and China do so (26% agree).
- 51% Disagree that Australia should wait for other countries before we strengthen our emissions reductions targets (24% agree).

Australians largely agree that Australia should take action on climate change.

- 71% agree that Australia should implement policies to protect the environment from the harmful impacts of climate change.
- 63% agree that Australia should be a world leader in finding solutions to climate change (74% Labor supporters, 83% Greens supporters)
- 73% say that tackling climate change creates opportunities in clean energy –jobs and investment

Continued....

Actions Australia should take with regard to climate change ...continued

“To what extent do you agree, or disagree with the following statements?” QB20

Should Australia follow USA in relation to the Paris Agreement 2015

“If President Trump pulls out of the Paris climate agreement, or signals that the USA will make no effort to achieve the climate goals it has agreed to, what should Australia do?” QB21

- If Trump pulls out of the Paris Climate Agreement only 26% of Australians say that Australia should change nothing, carry on as we are doing, Australians want the Paris Agreement goals achieved.
- The significant majority of Australians (61%) believe that Australia should work harder with the other countries to achieve the goals of the Paris Agreement (71% of Labor supporters, 84% of Greens, 48% of The Coalition supporters).
- Only 12 % say that Australia should do the same as the USA and either pull out of the Paris Agreement or make no effort to achieve our agreed goals.

Who is to blame for increasing electricity prices

“What do you believe is to blame for the increasing electricity prices?” QB22

- 70% of Australians blame the increasing electricity prices on the privatisation of electricity generation and supply (55%) or on Federal Government policy uncertainty or poor policy making. (81% in QLD and 80% in SA)
- One in three (34%) say that excessive gas exports have made domestic gas really expensive (45% in SA, 43% in WA).
- 24% say the reason for increasing electricity prices is that coal is closing and we have no clear plan on how to replace it (35% SA).
- 23% say that renewables can't be relied on all of the time so we need back up power (40% in SA).
- 21% say state restrictions on gas supply have made gas really expensive (29% in SA).

Rating the performance of groups on taking action on climate change

“How would you rate the performance of each of these groups in taking action on climate change?” QB23

- Of the eight groups in the community measured, the performance of the Federal government in taking action on climate change is rated worst of all eight, with 18% saying that they do a terrible job and a further 23% saying that they do a fairly poor job. Only 6% say that the Federal Government does a very good or excellent job.. This is marginally worse than the rating given energy companies.
- All government, state government, local government, energy companies, and other business/industry groups were rated more below average than above average performance.
- For all eight groups including environmental groups/non-government organisations, individuals/households and Global alliance groups such as United Nations, less than half of Australians say that any one group is performing at least ‘fairly good’ in taking action on climate change.
- Only the Environmental groups/non-governmental agencies had a ‘very good/excellent’ rating (19%) more than their ‘fairly poor /terrible’ rating (14%).
- We could all do more!

Continued....

Rating the performance of groups on taking action on climate change ...contd

“How would you rate the performance of each of these groups in taking action on climate change?” QB23

Statements of desired government activity on climate change

“To what extent do you agree, or disagree with the following statements?” QB24

- On balance, Australians disagree that state governments shouldn't act ahead of the Federal government on renewable energy (37% disagree, 30% agree), and they disagree that state governments shouldn't act ahead of the Federal government on coal-fired power phase out (36% disagree, 33% agree).
- Among the six alternatives Australians are most likely to agree that state governments need to plan for orderly phase out of coal so that workers and communities can prepare (72% agree).
- Australians are likely to agree that state governments should be putting in place incentives for more renewable energy such as wind farms (71% agree).

Continued....

Statements of desired government activity on climate change ...continued

“To what extent do you agree, or disagree with the following statements?” QB24

Which entities should be responsible for driving action on climate change

“How responsible do you think the following entities should be for driving action on climate change?” QB25

- Of the eight groups in the community compared, Australians clearly believe that the Federal government should take the leading role in driving action on climate change. It is the only group where more than half of Australians say that it should take a leading role (62% say Federal government).
- 47% of Australians believe that energy companies should take a leading role in driving action on climate change, slightly more than the proportion suggesting that state and territory governments should take a leading role (44%).
- Only 17% of Australians believe that individuals and households in Australia should take a leading role in driving action on climate change, but a further 64% believe that individuals should contribute.

Continued....

Which entities should be responsible for driving action on climate change

“How responsible do you think the following entities should be for driving action on climate change?” QB25

Perceived effectiveness of personal actions on reducing greenhouse emissions

“Please rate how effective you think the following personal actions are in reducing greenhouse gas emissions ?” QB26

- Australians believe that one of the most effective personal actions that they can take in reducing greenhouse emissions is to put solar panels on houses or to plant trees.
- One third (35%) of Australians believe that either of these actions would be ‘very effective’ actions for individuals to take in reducing greenhouse emissions. A further 23% believe that solar panels would be ‘quite effective’ and a further 21% believe that planting trees would be ‘quite effective’.
- Interestingly, of the nine personal actions, buying a more fuel efficient hybrid or electric vehicle is seen as one of the least effective means in reducing greenhouse emissions (19% say ‘very effective’, 10% say ‘marginal’ and 5% say ‘not at all effective’).

Continued....

Perceived effectiveness of personal actions on reducing greenhouse emissions

“Please rate how effective you think the following personal actions are in reducing greenhouse gas emissions ?” QB26

What have Australians done to reduce greenhouse emissions

“Here is a list of things that people might do. Have you done any of these in the last 12 months?” QB27

- There are three things that more than half of Australians have done in the last 12 months to help reduce greenhouse emissions:
 - > 61% Taken greater action on home recycling (68% females, 54% males) (73% ages 65+ years, 50% of Millennials 18-34 years)(72% SA, 72% WA, 55% VIC, 57% NSW).
 - > 58% Used energy efficient devices in home such as light globes or double glazing (81% ages 65+ years, 40% of Millennials 18-34 years).
 - > 57% Cut down on electricity they use (67% ages 65+ years, 46% of Millennials 18-34 years).
- One third (37%) have bought products that are labelled sustainable or environmentally friendly.
- 11% have donated money to an environmental cause.
- 6% have volunteered their time to an environmental cause.

Importance of factors in retail purchasing

“How important are the following factors to you in your purchase of everyday products?” QB28

- For the majority of Australians price is the dominant consideration in the purchase of everyday products, 57% say that it is ‘very important’, and 39% say that it is ‘quite important’.
- Whether or not a product is Australian made or produced is also important with 45% saying that it is ‘very important’ and a further 42% saying that it is ‘quite important’
- Whether or not a product is carbon neutral or climate friendly is the least important factor of the seven measured, with only 19% saying that it is ‘very important’ and 53% saying that it is ‘quite important’. 28% say that it is ‘not at all important’

Continued....

Importance of factors in retail purchasing ...continued

“How important are the following factors to you in your purchase of everyday products?” QB28

Do people believe that they should be part of the solution in climate change

“In terms of feeling that you are part of the solution in tackling climate change, which of the following statements apply to your experience?” QB29

- The majority of Australians (60%) want to be part of the solution and to meaningfully participate in tackling climate change.
- 32% want to be part of the solution but need more direction from government, or more options about how they can meaningfully participate.
- 28% want to be part of the solution but need more direction from other stakeholders about how they can meaningfully participate.
- 18% would like to be part of the solution but do not think that there is a meaningful or effective role that individuals can play
- 8% don't think that any responsibility for tackling climate change lies with individuals
- 14% say none of these

Questionnaire

GALAXY RESEARCH

GALAXY JOB NO. 170416
To be fielded no later than
Monday 24 April 2017

QUESTIONNAIRE NO: _____

Thank you for agreeing to participate in this survey. Please answer the following questions to see if you fall into the category of respondent we need to interview. You will need to provide a response for **every** question to proceed with the interview.

Please be assured of complete confidentiality. Galaxy Research is bound by the Market Research Society Privacy Principles.

During the survey, please **do not** use your browser's **FORWARD** and **BACK** buttons. Instead, please always use the buttons below to move backward and forward through the survey.

Your honesty is valuable and really appreciated.

Galaxy Research appreciates that most people give honest answers in our surveys and we want to keep it that way. We encourage truthful answers by making our surveys easy to understand, easy to complete and short enough to keep you going and ask that you:

1. Fill in all survey invitations to you, yourself
2. Read and follow all survey instructions and questions
3. Give due consideration to all your answers, and of course,
4. Always give honest and truthful answers

Galaxy Research monitors closely the data collected by participants in its panel surveys and has taken steps to detect any suspicious data.

We understand that you are most likely always honest and therefore we say thanks again and please keep responding to our surveys.

A1. Where do you live in Australia?

NSW - Sydney	01	Queensland - Brisbane	07
NSW – Other	02	Queensland – Other	08
ACT	03	South Australia - Adelaide	09
Victoria - Melbourne	04	South Australia – Other	10
Victoria – Other	05	Western Australia - Perth	11
Tasmania	06	Western Australia – Other	12
		Northern Territory	13
		Somewhere else	14

ASK IF RESIDE IN AUSTRALIA IE CODE 01-13 IN A1. CODE 14 TERMINATE WITH THANKS

A2. How old are you?

17 years or under	01	50-54 years	08
18-24 years	02	55-59 years	09
25-29 years	03	60-64 years	10
30-34 years	04	65-69 years	11
35-39 years	05	70+ years	12
40-44 years	06	Rather not say	13
45-49 years	07		

ASK IF AGED 18+ YEARS IE CODE 02-12 IN A2. CODE 01, 13 TERMINATE WITH THANKS

A3. And are you male or female?

Male

Female

SECTION B - ASK IF AGED EIGHTEEN YEARS AND OLDER

B1	Thinking about politics generally. Which political party do you tend to support or feel comes closest to representing your opinions? ROTATE 1-5	Please select one option only	<u>SR</u>

Not at all.....	4
Don't know	5

- B9 Which one of the following statements is closest to your opinion?
Please select one option only
- SR
- I think that **humans** are the main cause of climate change 1
I think that **natural cycles** are the main cause of climate change 2
I **don't know** the causes of climate change 3
I don't believe that climate change is happening at all 4

- B10 What do you think the average Australian believes to be the main cause of climate change?
Please select one option only
- SR
- They think that **humans** are the main cause of climate change 1
They think that **natural cycles** are the main cause of climate change 2
They **don't know** the causes of climate change 3
They don't believe that climate change is happening at all 4

B11 For each of the following statements about climate change please indicate the extent that you agree or disagree.
Rotate A-F

	STRONGLY DISAGREE	DISAGREE	NEITHER	AGREE	STRONGLY AGREE	DON'T KNOW
A. The seriousness of climate change is exaggerated.....	1	2	3	4	5	6
B. I trust the science that suggests the climate is changing due to human activities.....	1	2	3	4	5	6
C. There are too many conflicting opinions for the public to be sure about claims made around climate change	1	2	3	4	5	6
D. Ignoring climate change is simply not an answer as it increases the risk of the situation getting worse.....	1	2	3	4	5	6
E. Further extreme weather as a result of climate change will cause adverse economic impacts for Australia.....	1	2	3	4	5	6
F. Further extreme weather as a result of climate change will cause cost of living rises in Australia, such as increased food prices and higher home insurance premiums .	1	2	3	4	5	6

B12 How concerned are you that climate change will result in the following outcomes?

Rotate A-L

	VERY CONCERNED	FAIRLY CONCERNED	NOT VERY CONCERNED	NOT AT ALL CONCERNED	DON'T KNOW
A. Water shortages in our cities.....	1	2	3	4	5
B. More droughts and flooding affecting crop production and food supply.....	1	2	3	4	5
C. Animal and plant species becoming extinct	1	2	3	4	5
D. Destruction of the Great Barrier Reef.....	1	2	3	4	5
E. More extreme weather events like floods and cyclones	1	2	3	4	5
F. More heatwaves and extremely hot days.....	1	2	3	4	5
G. Rising sea levels threatening our coastal communities.....	1	2	3	4	5
H. More bushfires	1	2	3	4	5
I. More refugees and displaced peoples	1	2	3	4	5
J. Melting of the polar ice caps	1	2	3	4	5
K. Energy shortages and blackouts	1	2	3	4	5
L. Impacts on Health, eg illness related to: water scarcity or quality; heat; mosquito-borne viruses1	1	2	3	4	5

<<Energy Section>>

- B13. Please rank the following energy sources for Australia to use from your most preferred to your least preferred with your most preferred at the top and your least preferred at the bottom. **ROTATE A-H**

Please rank most preferred to least preferred

- A. Coal-
B. Gas-
C. Wind-
D. Nuclear-
E. Hydro (dams)-
F. Geothermal-
G. Tidal/Wave-
H. Solar-
I. Don't know-

- B14 Have you heard of the term 'pumped hydro'?

SR
Yes.....1
No.....2

- B15. 'Pumped hydro' is a type of hydropower that works like a battery: Electricity is used to pump water up from a lower reservoir to be stored in specially built higher reservoirs until it is needed. It can therefore complement intermittent energy, such as wind and solar – when the sun is not shining or wind not blowing, water can be released through the turbines to create back-up electricity, just as a battery can be turned on to supply back-up electricity. Like a battery, it is a storage technology.

By contrast, traditional or conventional hydro-electricity uses dams in rivers and other bodies of water to generate electricity, usually on a continuous basis. These dams are subject to the seasonal and river flow variations.

The use of renewables to generate energy in Australia is growing, however coal is currently the dominant source. There is much discussion about how our energy will be supplied in the future. With this in mind, which one of the following combinations do you think is best to meet Australia's future energy needs?

- A. **clean energy:** renewables supported by storage technologies (ie., batteries, pumped hydro)
B. **mixed energy:** renewables supported by gas and/or coal
D. **fossil fuels only:** coal and gas.

B16 For each of the following statements about climate change please indicate the extent that you agree or disagree.

Rotate A-C

	STRONGLY DISAGREE	DISAGREE	NEITHER	AGREE	STRONGLY AGREE	DON'T KNOW
A. Australia's current coal fired generation will need to be closed and replaced with clean alternatives 1		2	3	4	5	6
B. The market and energy companies should be the ones to decide when old coal plants are closed 1		2	3	4	5	6
C. Governments need to implement a plan to ensure the orderly closure of old coal plants and their replacement with clean energy 1		2	3	4	5	6

B17	Over time, Australia's coal-fired power stations are going to be replaced with cleaner technology, like wind and solar. This will involve costs - for new generation, site remediation and redundancies. Which one of the following do you prefer? Please select one option only		<u>SR</u>
		Keep them running for as long as possible and we will deal with the costs and negative impacts in the future	1
		Start phasing them out gradually so that we can manage the costs over time	2
		Phase them out as soon as possible so we can make a rapid shift to clean energy, even if it costs more in the short term	3
		Coal does not need to be replaced by other power sources like wind or solar power	4

B18	When do you think that Australia should completely end coal fired power generation? Please select one option only		<u>SR</u>
		Within the next ten years	1
		In the next 10-20 years	2
		In the next 20-30 years	3
		In the next 30-50 years	4
		Coal fired power should never be completely phased out	5

<<International context section>>

B19	Are you aware of the Paris Agreement - the international agreement reached at the UN International Climate Conference in Paris, at the end of 2015, where Australia and 196 other countries agreed to limit global warming to 1.5-2°C above pre-industrial levels by reducing emissions to net zero? Please select one option only		<u>SR</u>
		Yes	1
		No	2
		Don't know	3

B20 To what extent do you agree, or disagree with the following statements.

Rotate A-H

	STRONGLY DISAGREE	DISAGREE	NEITHER	AGREE	STRONGLY AGREE	DON'T KNOW
A. Australia should be a world leader in finding solutions to climate change	1	2	3	4	5	6
B. Tackling climate change creates opportunities in clean energy (e.g. solar, wind, geothermal) - for new jobs and investment	1	2	3	4	5	6
C. Australia should not act on climate change until other major emitters like US and China do so.....	1	2	3	4	5	6
D. Australia should enact a serious policy plan to deliver the commitments it made in Paris to get to net zero emissions ...	1	2	3	4	5	6
E. Australia should set targets and implement domestic action to help limit global warming to 1.5-2°C and achieve net zero emissions.....	1	2	3	4	5	6
F. Australia needs to help vulnerable peoples and developing countries adapt to the negative impacts of climate change ...	1	2	3	4	5	6
G. Australia should implement policies to protect the environment from the harmful impacts of climate change	1	2	3	4	5	6
H. Australia should wait for other countries before we strengthen our emissions reduction targets	1	2	3	4	5	6

B21 If President Trump pulls out of the Paris climate agreement, or signals that the USA will make no effort to achieve the climate goals it has agreed to, what should Australia do?

Please select all that apply

SR

Do the same as USA and either pull out of the Paris agreement, or make no effort to achieve our agreed climate goals 1

Work harder with the other countries to achieve the goals of the Paris agreement..... 2

Change nothing, carry on as we are doing 3

<<Responsibilities section>>

B22 What do you believe is to blame for the increasing electricity prices? **Rotate 1-7**

Please select all that apply

MR

Coal is closing and we have no clear plan about how to replace it 1

Renewables can't be relied on all of the time so we need back-up power 2

Renewable energy is expensive 3

Excessive gas exports have made domestic gas really expensive 4

State restrictions on gas supply have made gas expensive 5

The privatisation of electricity generation and supply 6

Federal government policy uncertainty or poor policy making 7

None/Don't know 8

B23 How would you rate the performance of each of these groups in taking action on climate change?

Rotate A-H

	EXCEL- LENT	VERY GOOD	FAIRLY GOOD	AVERAGE	FAIRLY POOR	TERRIBLE	DON'T KNOW
A. The Federal government	1	2	3	4	5	6	7
B. Energy companies.....	1	2	3	4	5	6	7
C. State & Territory governments.....	1	2	3	4	5	6	7
D. 'Non-energy' Australian businesses/industry	1	2	3	4	5	6	7
E. Local governments	1	2	3	4	5	6	7
F. Global alliances and groups such as the United Nations.....	1	2	3	4	5	6	7
G. Environmental groups/ non govt orgs	1	2	3	4	5	6	7
H. Individuals and households in Australia.....	1	2	3	4	5	6	7

B24 To what extent do you agree, or disagree with the following statements.

Rotate A-F

	STRONGLY DISAGREE	DISAGREE	NEITHER	AGREE	STRONGLY AGREE	DON'T KNOW
A. State governments should develop plans to phase out coal fired power stations.....	1	2	3	4	5	6
B. State Governments should be putting in place incentives for more renewable energy, such as wind farms ..	1	2	3	4	5	6
C. Delays or half measures on climate action and energy policy increase the risk of sudden negative economic adjustments, i.e., to jobs, electricity prices and energy security	1	2	3	4	5	6
D. State governments shouldn't act ahead of the federal government on coal-fired power phase out.....	1	2	3	4	5	6
E. State governments shouldn't act ahead of the federal government on renewable energy	1	2	3	4	5	6
F. Government should plan for orderly phase out of coal so that workers and communities can prepare.....	1	2	3	4	5	6

B25 How responsible do you think the following entities should be for driving action on climate change?

Rotate A-F

	SHOULD TAKE LEADING ROLE IN ACTION ON CLIMATE CHANGE	SHOULD BE CONTRIBUTING TO ACTION ON CLIMATE CHANGE	SHOULD NOT BE TAKING ACTION ON CLIMATE CHANGE	DON'T KNOW
A. The Federal government	1	2	3	4
B. Non-energy Australian businesses/industry	1	2	3	4
C. State & Territory governments	1	2	3	4
D. Energy companies	1	2	3	4
E. Local governments	1	2	3	4
F. Global alliances and groups such as the United Nations.....	1	2	3	4
G. Environmental groups/ non govt orgs	1	2	3	4
H. Individuals and households in Australia.....	1	2	3	4

<<Personal Action section>>

B26 Please rate how effective you think the following personal actions are in **reducing greenhouse gas emissions** (if we all do it)?

By greenhouse gas emissions, we mean heat trapping gases including carbon dioxide, which contribute to increasing the average temperature of the Earth (via the 'greenhouse effect'). Greenhouse gases can be emitted through activities including the burning of fuels, transport, and land clearing

Rotate A-I

	NOT AT ALL EFFECTIVE	MARG- INALLY EFFECTIVE	SLIGHTLY EFFECTIVE	SOME- WHAT EFFECTIVE	QUITE EFFECTIVE	VERY EFFECTIVE	DON'T KNOW
A. Putting solar panels on houses	1	2	3	4	5	6	7
B. Household recycling	1	2	3	4	5	6	7
C. Insulating houses	1	2	3	4	5	6	7
D. Planting trees	1	2	3	4	5	6	7
E. Increasing the use of public transport instead of private vehicles	1	2	3	4	5	6	7
F. Purchasing energy efficient light globes, products and appliances	1	2	3	4	5	6	7
G. Using your electricity more efficiently	1	2	3	4	5	6	7
H. Buying more fuel-efficient, hybrid, or electric vehicles	1	2	3	4	5	6	7
I. Purchasing household products that are marked as being climate positive or carbon neutral ..	1	2	3	4	5	6	7

B27 Here is a list of things that people might do. Have you done any of these in the last 12 months? **Rotate 1-8**

Please select all that apply

I have donated money to an environmental cause	1
Volunteered my time to an environmental cause	2
We use solar power at home	3
Used energy efficient devices in home such as energy efficient globes or double glazed windows	4
Bought products that are labelled as climate positive or carbon neutral	5
Bought products that are labelled as sustainable or environmentally friendly	6
Taken greater action on home recycling	7
Started taking more public transport and reduced driving	8
We have cut down on the amount of electricity we use	9
None of these	10

B28 How important are the following factors to you in your purchase of everyday products?

Rotate A-G

	NOT AT ALL IMPORTANT	QUITE IMPORTANT	VERY IMPORTANT
A. Price	1	2	3
B. A known and trusted brand	1	2	3
C. Fair trade or other key certifications	1	2	3
D. Environmentally friendly, in terms of production, packaging and recyclability	1	2	3
E. Australian made or owned	1	2	3
F. Locally produced in your area	1	2	3
G. Carbon neutral or climate friendly labelling or certification	1	2	3

SR

- B29 In terms of feeling that you are part of the solution in tackling climate change, which of the following statements apply to your experience?
- Please select one option only**
- I would like to be part of the solution but need more direction from government, or some/ more options about how I can meaningfully participate..... 1
- I would like to be part of the solution, but need more direction and options from other stakeholders about how I can meaningfully participate 2
- I would like to be part of the solution, but don't think there is a meaningful or effective role that individuals can play 3
- I don't think any responsibility for tackling climate change lies with individuals..... 4
- None of these..... 5

SECTION C – ASK ALL QUALIFYING RESPONDENTS

- C1 Finally, a question to ensure that we have interviewed a good cross-section of people. Which one of the following categories best describes your total household income before tax?
- Under \$40,000 1
- \$40,000 - \$69,999.....2
- \$70,000 - \$89,999.....3
- \$90,000 - \$129,999.....4
- \$130,000 or more.....5
- Prefer not to say.....6

Those are all of the questions. Thank you for your time and participation.

TABLE 25 B11. Statements *BY* B11. Level of agreement with statements about climate change

PAGE 69

BASE: WGHT SAMPLE (000s)

WEIGHTS: Age/Sex/Area

B11. Statements						
	B11a. The seriousness of climate change is exaggerated	B11b. I trust the science that suggests the climate is changing due to human activities	B11c. There are too many conflicting opinions for the public to be sure about claims made around climate change	B11d. Ignoring climate change is simply not an answer, as it increases the risk of the situation getting worse	B11e. Further extreme weather events as a result of climate change will cause adverse economic impacts for Australia	B11f. Further extreme weather events as a result of climate change will cause cost of living rises in Australia, such as increased food prices and higher home insurance premiums

	B16. Statements		
	B16a. Australia's current coal fired generation will need to be closed and replaced with clean alternatives	B16b. The market and energy companies should be the ones to decide when old coal plants are closed their replacement with clean energy	B16c. Governments need to implement a plan to ensure the orderly closure of old coal plants and their replacement with clean energy

BASE: WGHT SAMPLE (000s)

WEIGHTS: Age/Sex/Area

	B20. Statements							
	B20a. Australia should be a world leader in finding solutions to climate change	B20b. Tackling climate change creates opportunities in clean energy (e.g. solar, wind, geothermal) - for new jobs and investment	B20c. Australia should not act on climate change until other major emitters like US and China do so	B20d. Australia should enact a serious policy plan to deliver the commitments it made in Paris to get to net zero emissions	B20e. Australia should set targets and implement domestic action to help limit global warming to 1.5-2C and achieve net zero emissions	B20f. Australia needs to help vulnerable peoples and countries adapt to the negative impacts of climate change	B20g. Australia should implement other countries policies to protect the environment from the harmful impacts of climate change	B20h. Australia should wait for other countries before we strengthen our emissions reduction targets

B24. Statements						
	B24a. State governments should develop plans to phase out coal fired power stations	B24b. State governments should be putting in place incentives for more renewable energy, such as wind farms	B24c. Delays or half measures on climate action and energy policy increase the risk of sudden negative economic adjustments i.e. to jobs, electricity prices and energy security	B24d. State governments shouldn't act ahead of the federal government on coal-fired power phase out	B24e. State governments shouldn't act ahead of the federal government on renewable energy	B24f. Government should plan for orderly phase out of coal so that workers and communities can prepare
