---

00:20:15 Rudolf Blums: Hallo from Belgrave, Wurundjeri land

00:20:17 Rhiannon: Hi all - Rhiannon from The Australia Institute here. Thanks for joining us today. Looking forward to a great webinar!

Just a little reminder that the chat has options for 'all panellists' or 'all panellists and attendees'. Choose the latter option to participate in the chat with everyone.

Also, use the Q&A function to submit questions for the panellists to answer live, or upvote any other questions you'd like answered!

00:20:46 Gerard Biddle: Hi all from Wadawurrung Country

00:22:33 Kathleen Davies: Thanks again for your work TAI. A very exciting time to be alive!

00:22:42 Rudolf Blums: "NewsCorp"?, "Credibility"? Yeah, I'd like to believe that.

00:23:04 Frank Freschi: Just made it - would not miss it for anything.

00:23:22 Kerry Silcock: Good morning from Ngunnawal country. Thank you so much TAI for the great work!

00:24:02 Eric Pozza: Good on you Ben and TAI. Just hope we are not just talking to ourselves.

00:24:03 Nick Gemmell: Morning from Wagga Wagga. Wiradjuri Land. Nick

00:24:23 Lydia Nenai: Good morning from Port Moresby, PNG. Thanks for being a part of this.

00:24:28 George Naumovski: Hello from Bundoora.

00:24:35 Florence McCarthy: Coal mines have left behind huge voids that leak methane and pollute the groundwater -- also allowing loss of groundwater thru evaporation. What policies are you developing to remedy this? Surely a job creation opportunity?

00:24:50 Anne Heard: Thanks for this webinar! I'd be lost without TAI.

00:24:55 Rosemary Dunworth: Good morning from Gunai Kurnai country, Gippsland, Victoria. Greaat to be here and listen.

00:25:13 Gregory Olsen: Greetings from Bundanoon, in the NSW Southern Highlands, on Gundungurra land, never ceded! :-)

00:25:21 Rafeel Perez: Good morning to all, Rafael Perez

00:25:35 KAREN PRESBURY: Hello from Gadigal Land. Thanks for all your great work, TAI. It is so important

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

00:25:50 Roger Tonkin: I blinked. Before the blink, the Murdoch Press was powering along the climate change denial path. After the blink, it was powering along in reverse. The path must have been the road to an environmental Damascus.

We are supposed to believe that “the facts changed”, so Rupert changed his spots. But the facts did not change in the blink of my eyes.

So what changed? Not the writing on the wall, because that has been there since well before truth became inconvenient.

00:25:52 Jay Wilson: G'day from San Francisco

00:25:56 Noel Willis: Good morning from the Blue Mountains - Gundungarra/Darug country.

00:26:03 Joanne Fraser: Good morning from Yugambeh country

00:26:03 Fred Sim: Kaya all from Noongar country over in WA. Australia WERE leading the world with the Clean Energy Act in 2011.... what a waste of the decade since. We would have been heads and shoulders above other nations had it not been for the dinosaurs...

00:27:03 Helen no Proud: Helen Proud from Gadigal country, Dungog, NSW. Hello and thanks for sharing from the Australia Institute.

00:27:11 Victoria Collins: Good morning from Darkinjung Land. Can I just say that I am sceptical of Scott Morrison's Road to Damascus via Glasgow, conversion to Climate Action.

00:27:18 Sandy Buck: hello from boonwarrung country

00:27:19 Sandra Macdonald: Hi everyone from GunaiKurnai country and thank you TAI

00:27:48 Carlien Le Lacheur: Hello from Yugambeh country and yes thank you TAI.

00:27:52 Jenny Searles: Hello from Wonnarua Country, Hunter Valley. It's high time we transitioned away from coal here.

00:27:52 Ron Lawler: Greetings from Wiradjuri country, Wagga Wagga

00:27:56 steven hoy: After the past nearly 10 years of word games, I won't believe any LNP target until I see it legislated

00:28:06 Merah Hashmi: Hello from Ngunnawal country. Thanks very much TAI!

00:28:12 David Whitehouse: Hello from Neutral Bay in Cammeraygal Land.

00:28:16 Gavin Gilchrist: Hello all from Sydney's Inner West. Let's hope Chris will today announced Labor's 2030 target.

00:28:39 BRUCE DALKEITH: HI EVERY ONE

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:29:24 Angela Michaelis: From Gadigal land, I'm a member of Climate Change Balmain-Rozelle, who were lucky enough to hear from Richie last night. Thank you to The Australia Institute!
- 00:29:39 Jock Churchman: Hello from Kurna country. Now is the time for real action. It is agreed world-wide that real action involves ceasing the extraction and burning of all fossil fuels. Can we be sure that Labor will do this and not just go half-way while keeping coal extraction going and accepting gas as a stop-gap fuel. Will they also promote electric vehicles and the infrastructure required?
- 00:29:40 Diane Calleja: Listening from Wurundjeri Woi-Wurrung land in Heidelberg
- 00:30:21 Meredith Kefford: Will Labor stop accepting donations from fossil fuel industry?
- 00:30:42 Valerie Boshier: Val Boshier Tocumwal Yorta Yorta country. sorry skeptical of Labor talk the talk but don't walk the walk eg support new coal mines????
- 00:30:51 jennifer manson: Good question Meredith!
- 00:30:51 Pauline Roberts: Hi from Taungurung country. Just wondering if 'Scotty come Lately' is on the road to Damascus?
- 00:31:20 Noel Willis: I'm guessing Labor's 2030 target will "trump" Morrison - with a target of 30% emissions reduction on 2005 emissions (or am I being too cynical).
- 00:31:43 jennifer manson: Agree Val
- 00:32:22 BRUCE DALKEITH: WHY NOT CHANGE SALT WATER INTO FRESH WATER AND PIPE INTO THE OUTBACK LIKE CALGOLE.
- 00:32:25 Barbara Lyle: Greetings from Worimi Lands. This is our single biggest challenge
- 00:32:27 Nicola Card: Hello all from Wurundjeri land. Congratulations to TAI for this and all other significant reports and research. Looking forward to hearing more from Chris Bowen too at Smart Energy Council's climate summit <https://smartenergy.org.au/events/the-global-race-to-zero-summit/>
- 00:32:48 jennifer manson: Don't want to hear political lobbying Christ Bowen. Want to hear about climate!!!!
- 00:33:30 jennifer manson: Stop the focus on the opposition! Talk about climate
- 00:33:38 Martin McAvenna: Does the survey include demographic breakdown & how do we access the details?
- 00:33:47 Kylie McIntosh: Can Labor legislate to ensure truth in political advertising in election campaigns to stop some of these nonsense claims e.g. EVs ending the weekend etc etc??

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:33:50 Eric Pozza: Great to hear some straight talk for a change. Labor has been running scared for too long
- 00:33:59 Angela Michaelis: I think the concern is not that the Coalition will run a scare campaign, but that this time they will claim they are taking action (even though they will not commit to real measures to deliver serious cuts).
- 00:34:13 jennifer manson: Sick of hearing politicians bagging each other!
- 00:34:14 Katie Dyer: That is a long list of 'guys', looking forward to more female leadership on this issue
- 00:34:18 Suzanne Rogers: Very sick of politicians gaslighting and spin doctoring.
- 00:34:32 Jock Churchman: Can we get rid of these ridiculous brainless slogans? The latest "technology not taxes" appeals to the Australian mania for opposing taxes. Yet we do need a price on carbon which the LNP will call a tax as before.
- 00:34:35 Eric Pozza: And LNP uses fear? I reckon there's tons of fear available in climate, in a war with China, with cost to economy if we keep coal..
- 00:34:44 Anthony Morrissey: China is building more coal fire power station. it appears is I not worry about climate change
- 00:35:07 Alex Chapman: Can we stop the blaming people and start working on a Solution?
- 00:35:18 Ellie Hall: I work in climate action for a local government, which, without federal policies or support can be much more work than it should be. It's really refreshing to see, through this report, that the majority of Australians support our work at least!
- 00:35:27 Gill King: Disappointed that Chris Bowen is attacking the Govt just at this critical time when they are starting to shift and need encouragement - we need to take the partisan politics out of climate action
- 00:35:34 Gregory Olsen: The Federal Environment Minister, Sussan Ley, has approved four coal mine expansions in the last month. How can we stop this outrageous assault on the climate and her abrogation of the findings of a Federal Court case – known as the Sharma case – which found she had a duty of care to protect young people from the climate crisis?
- 00:35:46 Felicity: We need 50% at least by 2030. I think the tide is turning at last! Matt Kean is going great guns today. Planning to put \$3 billion into clean hydrogen. Being both the Treasurer and Planning Minister in NSW he can do it!
- 00:35:57 Annette Luders: Clearly in 'election mode' here!
- 00:36:06 jennifer manson: Chris, you're here under false pretences. If you want people to listen about climate, stop talking about the opposition,

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:36:13 Eric Pozza: Let's not be too pure. LNP hasn't been and they've kept winning elections. A few truths about dangers of climate won't harm, or about the one political party that's closed down an effective climate program (Gillard's)
- 00:36:26 Suzanne Rogers: We need to ensure that future technology such as batteries and solar do not also require minerals and metals that increase mining. Protect Australia's ancient history and environment for all
- 00:37:10 Annette Luders: So Chris, what exactly are your plans??? Haven't heard anything new or different yet!!!
- 00:37:11 Darryl Fallow: Agree Gill King - We need to have people being constructive and working together if at all possible
- 00:37:21 Felicity: It is coal, oil and gas that we need to stop mining.
- 00:37:34 Wendy Baker: Chris, we here to hear about climate change and what Labor proposes - we don't appreciate election mode taking over. Wendy Baker, Lilydale, Vic
- 00:37:50 Dan Ryan: I thought this event was meant to tell us the survey feedback?!
- 00:37:59 Andrew Holliday: Betrayed...hmmm...how is Joel?
- 00:38:05 Jennifer Manson: Can we please hear from someone focussed on climate and not on politics please?
- 00:38:07 Eric Pozza: We had Labor telling us all they were going to do at the last election and they lost. Due to scares and the rest, but they lost
- 00:38:10 Claire Bettington: I will be extremely annoyed if Scotty turns out to be the Messiah, rescuing the planet from climate change; having said that, I don't care who does it, so long as SOMEONE does!
- 00:38:48 Eric Pozza: LNP will claim climate in coming weeks. Let's remind them of Abbott
- 00:39:00 Andrew Holliday: Norway reduced the price of EVs by removing taxes from them. Is the ALP going to follow suit?
- 00:39:05 Wendy Baker: We are here because we are already converts! Get to how we get emissions down! WB
- 00:39:05 Alex Chapman: How do you make electric vehicles available to the majority of the population?
- 00:39:15 Victoria Collins: Amazing the number of people who criticise the Labor Party when they know the only alternative is the Coalition.
- 00:39:19 Kathleen Davies: yeah....EVs are so good that the State of Victoria is taxing them and making them less affordable....

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:39:24 Felicity: Here here! But it would be gawling if it was him!
- 00:39:35 pam stagg: Don't hold your breath for Scotty saving the planet from CC. He's the slowest acting leader of any country on that! With maybe the exception of Bolsenaro.
- 00:40:00 Eric Pozza: Victoria, yes, so true. Essentially it's labor or LNP. Perhaps Labor with independents and greens onside
- 00:40:07 steven hoy: Thanks Chris. I am happy to listen to the politics as it's critical to galvanising action. Chris is getting to the details don't worry
- 00:40:40 Sandra Macdonald: I agree with Claire :(
- 00:40:46 Dan Ryan: waste of time, false advertising about this event, there's hardly any stats being discussed. I'm out. done.
- 00:40:53 Claire Bettington: Ah ha, "Rewiring the Nation" - you've been talking to Saul Griffiths! GOOD!!!
- 00:40:53 Diana Beere: Agreed, Steven Hoy!
- 00:40:54 Meredith Kefford: The alternative to a Labor Government is a Labor/Greens/progressive independents balance of power
- 00:41:02 jennifer manson: At last, he focussed on policy and issues, not people in the opposition.
- 00:41:13 Victoria Collins: Kathleen Davies, the EVs do not use petrol so when that tax goes and EVs take over any government will need to find a way to fund our roads highways and bridges.
- 00:41:19 Jillian Van: What is coming from the PM at the moment is pure SPIN. All this government has done is tell us how "good" they are.
- 00:41:36 Hamish Maclean: But yeah, you support a gas fired recovery... independents  

- 00:41:53 Claire Bettington: Martin Green, prof at UNSW - a case of nominative determinism? I hope so.
- 00:41:57 Wendy Cox: Supporting gas is misdirected
- 00:42:09 Angela Michaelis: Agree with Meredith Kefford comment.
- 00:42:12 Christophe Menage: Is partisanship going to get us the outcome we seek and NEED? Will our innovations be as.... innovatively 😊 ..... broad and capable if we persist in point scoring? Other than momentarily feeling vindicated or fuelling egos, how is the collective national interest served by indulging in mudslinging and "told you so's"? Less focus on personality more on policy. Less on identity, more on innovation. Let's get this show on the road once and for all!

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

00:42:21 Suzanne Rogers: Thank you Chris, I hope Labour can do these things. At the very least force whoever is in leadership to make it happen.

00:42:29 jennifer manson: Our independents are the only ones who keep the others honest. Pity they have limited power to set policy.

00:42:37 Audrey Quicke: Thanks all for joining this Climate of the Nation webinar.

You can check out the full report here: <https://australiainstitute.org.au/report/climate-of-the-nation-2021/>

00:42:39 S A Hamed Hosseini: electric cars electric cars. not even a word mentioned about the public transport.

00:42:48 Rhydian Cowley: You know the saying, 22nd time's the charm

00:42:52 Jules Pennell: Agree with Meredith. Greens & progressive independents having the balance of power in both houses is our only hope.

00:43:02 Felicity: Don't mention any silly taxes!

00:43:06 Gill King: Victoria Collins - fuel tax goes into consolidated revenue, is not directed at roads etc

00:43:07 Andrew Holliday: Chris sounds like he's reading from Monday's Newscorp wraparounds....

00:43:20 Noel Willis: Will the Australia Institute also have a Greens spokesperson on this vital issue?

00:43:20 Rhiannon: The results of the 2021 Climate of the Nation survey can be accessed here: <https://australiainstitute.org.au/report/climate-of-the-nation-2021/>

00:43:22 Gregory Olsen: Victoria Collins, you commented that the only alternative result in the upcoming Federal election is a Labor Government. This is not correct. A hung Parliament will enable progressive independents and Greens to hold the balance of power and force action on climate change. This is what I want. :-)

00:43:28 John Abdel-Ahad: Chris thanks, I thoroughly enjoyed your speech.

00:43:44 Victoria Collins: EVs refers to Electric vehicles of all sorts, which includes Public Transport and Trucks.

00:43:48 Ros Blackwood: Once Labor was ambitious and bold on what they would do for reducing emissions. We need Labor to go back to this type of target

00:43:58 Anne Heard: Taking private sector out of the game reduces the profit imperative and so results in lower costs.

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

00:44:03 Claire Bettington: Reading Crikey's series on Scotty's beliefs yesterday, it's clear he believes that God has to fix the planet, not him! Explains a LOT about his policies too. And I thought we were a secular nation, with separation of Church & State? All I have to say to that is ROBODEBT, which killed over 2000 poor people!

00:44:04 John Englart: For Those interested in the report rather than Bowen's speech: <https://australiainstitute.org.au/post/all-time-high-of-75-of-australians-concerned-about-climate-change/>

00:44:07 Darryl Fallow: Onside with Gregory Olsen!

00:44:09 Fred Engels: Why can't the opposition send someone to COP26?

00:44:23 Nick Gemmell: Can you forward a copy of this Report?!? N

00:44:33 James Whelan: Slashing GHG emissions by at least 50% this decade is the highest priority. That's the commitment we're looking for.

00:44:46 Jenny Holmes: 2030 should be the benchmark not 2050. Jenny Holmes, ACT.

00:44:48 Lindsay Ferguson: Wonder how today's event would have gone with say, Taylor or Pitt doing the wrap. No politics? You'd be joking. It's ALL politics and no policy and look where it's got us.

00:45:03 Rosemary Dunworth: Thanks Chris for your words. I really appreciated what you had to say. given us a few points for discussion.

00:45:08 Kathleen Davies: Agree Victoria Collins - there should be a national approach to road funding, lets have a conversation rather than slapping a flawed tax on EVs. Federal fuel excise has not been directly used for roads since 1950s so even petrol users have not paid for roads. Perhaps the next fed government will fix the constitutional tax issues around excise.....<https://chuffed.org/project/evtax>

00:45:18 Brendan ORegan: What will your party do to change the way private donations will be made in the future as plenty of money is not recorded in real time and found to impede the ability for political parties to action a progressive vision linked to IPCC recommendations?

00:45:24 Ros Blackwood: Absolutely 2030 has to have extremely ambitious target and stop exporting FF

00:45:31 Wendy Cox: support @Kathleen on EVtax

00:45:38 Joanne Fraser: having trouble with internet will have to watch the recording

00:45:40 Hamish Maclean: Let's not forget net zero 2050 is still a disaster! What happened to 2030?

00:45:42 Anne Heard: Subtext is that any ALP released policy with either be stolen or demonised...

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:45:47 Fred Engels: Agreed Jenny!
- 00:45:59 Fiona D'Souza: Report: <https://australiainstitute.org.au/report/climate-of-the-nation-2021/>
- 00:46:23 Rosemary Dunworth: Agreed Anne Heard.
- 00:46:27 Victoria Collins: Agree Anne Heard. The Coalition have always and will always steal Labor's policies. And then claim credit for them!
- 00:46:38 Jock Churchman: Victoria Collins. We actually need a re-think of how we do everything, including transport and also including individual ownership of everything. We need fewer cars, so fewer roads.
- 00:46:38 Jenny Holmes: Thanks, Fred, Jenny
- 00:46:49 Suzanne Rogers: Opinions are flexible and should be open to change. How do we stop ppl like Bolt, Jones, Palmer, Abbott etc from stubbornly refusing climate change? The influence these people have is facical
- 00:47:07 Victoria Collins: Jock Churchman,
- 00:47:10 Lindsay Ferguson: Yesterdays
- 00:47:13 Trevor Bacon: NSW Govt sets 2030 target while currently considering opening up to 15 new coal mines
- 00:47:32 Chris Nash: The Australian Electric Vehicle Assoc has a pledge page to take control of your own emissions and move this debate forward. Please sign up at <https://aeva.asn.au/forms/2030-vision/>
- 00:47:52 Suzanne Rogers: Trevor Bacon - and those mines boarder national parks and heritage sites!!!
- 00:48:02 Victoria Collins: I know that urban sprawl is a problem and we should do something about that too. I was mainly talking about the roads, highways and bridges we already have. They need to be maintained for EVs as well.
- 00:48:02 Brendan ORegan: It is very expesive to electrify ones home!
- 00:48:05 Claire Bettington: Scotty & half his cabinet are Pentecostals, they believe climate change is up to God, and that they cannot do anything about it! They don't believe that Man could change the climate of the planet! We have very little hope they will ever do anything about CC.
- 00:48:21 Hamish Maclean: Is there analysis of responses by Federal electorates? It would help voices groups etc apply pressure.
- 00:48:27 Nick Gemmell: Thankyou. N

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:48:36 Fred Sim: 100% Chris!
- 00:49:10 Angela Michaelis: Brendan O'Regan, savings are there if run on renewables - but you can have a plan to change over a decade.
- 00:49:20 Anne Heard: Brendan, you're correct. Same as sewerage and mains water - individuals rely on central policy and subsidised rollout.
- 00:49:24 John Knox: or maybe overbuild the network - we can find things to do with the excess
- 00:49:38 Marion Jacka: what about ALP position on new gas projects?
- 00:49:42 Eric Pozza: It's true that Labor's policies are limited and not exciting like last time. But then they lost last time.
- 00:49:44 Claire Bettington: Thanks to Saul Griffiths! Rewiring the Nation!!
- 00:49:45 Steve Blume: Interesting tactical position from Labor & understandable - but need to come immediately the LNP announces theirs. There is no 'well before the election now - the election is imminent - perhaps Nov 27 or Dec 4th. Labor took 45% by 2030 to the 2019 election. The US, UK & EU are now at 50% by 2030 as is NSW. 50% is not 'ambitious' it is what can be achieved easily. Ambition would see 55% by 2035. This is the minimum needed - 9% reduction a year.
- 00:50:01 Suzanne Rogers: Electricity is great but I worry that raising the Warragamba Dam will destroy environment, increase extinction rates of wildlife.
- 00:50:01 Lindsay Ferguson: Yesterday's poll position via AI and Guardian tells us it is the 12% minority who are anti-vaxxers, climate change deniers. And yet both political parties pander to this group. Why? When are our 'progressive' politicians going to assume their role as leaders and educators, and get this mob back in their boxes where they belong. Science? Reasoned argument? evidence?
- 00:50:17 Valerie Boshier: Agree Trevor they think we don't understand the connection! between new coal mines and emissions!
- 00:50:20 john merory: We have to draw down, not just reduce emissions. Our forests would be very important for this - allow them to expand. Including the mangrove forests and sea grass meadows.
- 00:50:39 S A Hamed Hosseini: the 1 million dollar question is who is going to own the transition to renewables if it finally happen. the corporations again or the communities?
- 00:50:53 Felicity: Upgrading the grid is very good.
- 00:50:55 Annie Mcloughlin: Is there any chance this upgrading of the grid could mean that the public money spend could mean the return of public ownership and also coordination power in the future.
- 00:51:02 jennifer manson: Good points Lindsay!

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:51:04 Liz Reen: For opinions across electorates check the recent Yougov poll. Find your own at <https://togetherwecanmovement.org.au/poll>
- 00:51:10 Suzanne Rogers: Any way we can ensure that rental housing HAs to have solar power?
- 00:51:11 Felicity: Wouldn't that be nice!
- 00:51:13 Anne Heard: Exactly, Annie!!
- 00:51:25 Hamish Maclean: Insulation still needs be in the mix for houses. Cheap, reduce energy use, more equitable
- 00:51:44 Steve Blume: There is no Dunkenglaute in Australia. See <https://ieefa.org/ieefa-australia-afraid-of-the-dark-and-clutching-at-coal-esb-is-still-beating-the-capacity-mechanism-drum/>
- 00:51:46 Claire Bettington: Batteries. Are there any downsides, eg destruction of the areas where Lithium is mined? Or are they being made of other materials now?
- 00:51:55 Felicity: This should have happened 10 years ago.
- 00:51:58 Gavin Gilchrist: If anyone in NSW wants help buying quality rooftop solar at a fair price, contact me though [www.innerwestcommunityenergy.org.au](http://www.innerwestcommunityenergy.org.au)
- 00:52:19 S A Hamed Hosseini: turning the households to the subservient of the privatized energy is not a progress, it is serving the corporate interest. the energy should be controlled and owned by the community.
- 00:52:23 Gerard Biddle: What about islands around provincial cities and large towns with say 500MWH battery storage interconnected to intervening grid?
- 00:52:24 John Knox: Why not have a Tesla megapack at every sub-station?
- 00:52:25 Eric Pozza: Felicity, a lot of climate action did happen 10 years ago. Just that Abbott closed it down
- 00:52:27 Jenny Newell: Spot on John Merory - drawdown is crucial. Seaweed farms and algae bioreactors also important (algae technologies really taking off now - see what Deep Green Hub at UTS is doing).
- 00:52:31 Jock Churchman: Electricity demand varies during the day. The SA branch of the Labor Party (I am not a member) has proposed that we generate hydrogen by electrolysis (high electricity use) when other demand is low, so keeping the system stable. This is called firming and deserves consideration.
- 00:52:36 Victoria Collins: This did happen 10 years ago. Then along came Tony Abbott and News Corp.
- 00:52:42 Kate Gordon: ALP need to get moving with cleaner manufacturing.....and ensuring we have enough big thinkers in this vacuum to ensure the transition away from fossils is expedited

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

to make up for the precious lost time politicising this critical issue. Do we need to attract more the likes of Saul Griffiths to get going?

00:52:53 Sandy Buck: wouldn't electrifying everything help the LNP? It will take a while to convert the country to renewable energy, therefore continued use of coal generated electricity!

00:52:55 Steve Blume: ALL technologies have environmental costs as does all human activity. Renewables decrease that, but cant be allowed to ignore environmental issues.

00:53:21 Angela Michaelis: Jock Churchman, yes!

00:53:37 Barry Traill: lost of words at BCA switchery

00:53:43 Fred Engels: That will be Inp NBN policy!

00:53:50 Sandy Buck: Must be the high qualt NBN

00:53:54 Victoria Collins: FTTP now! :)

00:54:04 Burchell Wilson: There's actually no modelling detail in the BCA report put together by Access Economics:

[https://www.bca.com.au/achieving\\_net\\_zero\\_with\\_more\\_jobs\\_and\\_stronger\\_regions](https://www.bca.com.au/achieving_net_zero_with_more_jobs_and_stronger_regions)

00:54:21 Russell Scattergood: Malcolm Turnbull's NBN!

00:54:36 john merory: also a reduction of population and per capita consumption

00:54:56 Rod Holesgrove: I hope Labor will have a green and blue carbon store policies i.e policies to prevent land and marine habitat loss as well as vegetation restoration - a win win for climate , biodiversity , fresh water etc

00:55:30 Lois Levy: What plans does Labor have for a fair transition from coal, oil and gas to renewables?

00:55:39 Steve Blume: <https://www.crikey.com.au/newsletter/11-10-21/?>

00:55:55 Jen Sinclair: Fossil fuel industries will do WHATEVER it takes to hold on to power including holding democracy hostage and spreading lies through whatever media possible. They need reigning in.

00:56:10 Rowan Rafferty: If we are seeing changes in policy that's good. Don't expect to see the RW "modelling" it will remain election strategy .... until after the election. Sans Policy.

00:56:42 John Englart: 34 nations have now signed Global Methane Pledge initiated by US & Europe as at 11 October. Australia is not one of them.

<https://takvera.blogspot.com/2021/09/global-methane-pledge-aims-for-30.html>

00:56:44 Suzanne Rogers: integrity YES. Ability to trust our so called leaders would be lovely

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:56:47 Ros Blackwood: Integrity is also stopping export of FF
- 00:56:56 Steve Blume: CCS & gas is at the core of the BCA - its zombie technology
- 00:57:06 Kate Gordon: We need to change the conversation from the loss of jobs in fossils to the opportunities offered by renewables.....
- 00:57:10 Victoria Collins: The BCA need to say openly that Coal needs to be retired.
- 00:57:27 Angela Michaelis: Yes Ros Blackwood!
- 00:57:31 Jen Sinclair: Agree Victoria
- 00:57:52 Janelle Speight: How about rotating panel of Scientist advising Government on permanent basis on these topics especially with development. We seem to have plenty of lawyers and business people in politics but not enough diversity with STEM/STEAM groups. Also not be able to take things to court constantly until it is over thrown in favour of development at the cost of bushland, flora, fauna and climate impact.
- 00:57:57 Shobha Varkey: Yes!
- 00:58:10 Kate Gordon: And yes again!
- 00:58:23 Lois Levy: I see the Murdoch media after a brief flurry on renewables are now promoting nuclear power. How does the Labor Party view this?
- 00:58:31 Gill King: Glad to hear Chris Bowen willing to work with BCA despite being late to the party - but Is ALP willing to take the community's lead and stop making climate action a partisan political issue and instead call for everyone to work together - just like on issues like national security and COVID? WW2 and early response to COVID are excellent examples of how much can be achieved in extremely short time. (my Q in the Q&A)
- 00:58:31 Claire Bettington: Murdoch is a blight on our planet
- 00:58:33 Annie Mcloughlin: Obviously and election is here and the falsely dressed have arrived again
- 00:58:38 Jenny Backholer: Agree with Fred Engels. How about Chris Bowen attend Glasgow using his parliamentary travel allowance to show the ALP is fair dinkum about this. Time for the ALP to demonstrate some leadership rather than just waiting for the Coal-ition to stuff up further.
- 00:58:43 Gerard Biddle: Gerry Biddle to everyone: what can be done about highlighting the conflicts of interest of Palmer Angus Taylor, Matt Canavan and their coal interests?
- 00:58:47 Diana Beere: Disinformation has been hugely problematic, and it still is!
- 00:58:47 Felicity: I want to hear MPs saying what it will cost if we DON'T stop using fossil fuels!

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 00:58:51 Eric Pozza: Ebony, there aren't many conflicting opinions if you go to reliable scientific sites, CSIRO, ANU, NASA etc
- 00:58:53 Victoria Collins: Jen Sinclair, if the BCA did that there would be a paradigm shift in Australia.
- 00:58:58 Wendy Cox: Newscorp opinion commentators won't change though eg Bolt
- 00:59:16 Ros Blackwood: Yes Shoba
- 00:59:19 Steve Blume: @Janelle Speight We had one called the Climate Change Council. We also have a Climate Change Authority - with Grant King as Chair!
- 00:59:23 Wendy Cox: Where's our Fed ICAC?
- 00:59:42 Leonie Lane: Fantastic to hear about 1bn investment by Twiggy Forrest in green hydrogen manufacturing centre in Central Queensland!
- 00:59:45 Denise Salvestro: Bolt said he would walk....hopefully he keeps his promise!
- 00:59:45 Suzanne Rogers: Newscorp needs less attention b/c excel at manipulation, gaslighting and fake news.
- 00:59:50 Jen Sinclair: Clive Palmer is a blight on democracy and effective climate policy
- 00:59:52 Gregory Olsen: Gotta go. I'll view the recording. Thanx TAI! 😊
- 01:00:08 Rowan Rafferty: Absolutely Leonie Lane
- 01:00:09 Annie Mcloughlin: Low literacy levels in the general Australian population will mean information must be put in more ways than reports etc
- 01:00:18 Eric Pozza: Chris great yes call out misinformation
- 01:00:19 jennifer manson: Newscorp wants to make money and it's finally realised that most people want climate issues addressed. Only populists can make lots of money from the bulk of the population
- 01:00:33 Felicity: Clive Palmer is a poisonous monster!
- 01:00:35 Lorraine Tighe: It should be illegal to spread disinformation in election campaigns and adverts
- 01:00:40 Andrew Holliday: Newscorp will keep Bolt etc to 'prove' their independence and impartiality - he'll be their token 'nutjob' in the same way Philip Adams was their (his description) 'token lefty'.
- 01:00:49 john merory: global emancipation of girls and women, being much tougher on harassment and bullying, allowing women control of their bodies , fertility and education, job and career choices, etc will reduce population and increase expertise.

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:00:53 Victoria Collins: Clive Palmer is a toxic emission!
- 01:01:01 Merah Hashmi: pretty sure the first question is about fossil fuel donations to ALP?
- 01:01:07 Eric Pozza: Chris having problems with our \$55b NBN?
- 01:01:16 Claire Bettington: THANK YOU MALCOLM TURNBULL FOR A 3RD RATE NBN!
- 01:01:23 Steve Blume: Chris and others will be on the Smart Energy Council Global Race to Zero next week <https://smartenergy.org.au/global-race-to-zero-summit/>
- 01:01:33 Richard Tuffin: One issue about calling out mis-information on Facebook is that by doing so, you're amplifying the message amongst your social network.
- Bit of a tricky one there.
- 01:01:34 Jen Sinclair: Agree Lorraine. Stronger laws to protect and strengthen democracy urgently needed.
- 01:01:41 Andrew Holliday: For democracy to work, voters have to be informed. How can that sit with allowing lies in election campaigns - the process by which voters are informed?
- 01:01:50 S A Hamed Hosseini: could you please fellows read my question in Q&A and if you like it please then LIKE to raise it?
- 01:02:00 pam stagg: Victoria Collins, GOLD!!!
- 01:02:02 Diana Beere: Every time you correct disinformation in social media, you're actually spreading that material further. Better to post the positive stuff and keep that in front of people's faces instead. Just ignore the disinformation! (I know it's heard!).
- 01:02:20 Diana Beere: Hard, not heard
- 01:02:30 Ros Blackwood: We need legislation for the far more ambitious targets by 2030
- 01:02:36 Jen Sinclair: Great suggestion Diana. Agree. More positive news needed to change the conversation.
- 01:02:36 David James: come on ALP and either poo of get off the potty. What is alp figure for 2030-5, cough it up or get bypassed by the Libs. david james
- 01:02:36 Fred Sim: Why re-invent the wheel when you could introduce Zali's bill??
- 01:02:58 Jenny Dibley: I thought News Corp said it was toning down its messaging re CC in a two week campaign before COP. What will the messaging be after COP?
- 01:03:07 Beverley May: Exactly Fred! Work as a team!

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:03:09 Claire Bettington: SUE HER! WORST ENVIRO MINISTER EVER!!!
- 01:03:34 Fred Sim: Good legislation is good legislation regardless of who introduces it
- 01:03:44 Shobha Varkey: Yes about time to change the federal government. Let's vote for it!
- 01:03:44 Claudia Caliri: Climate Action stops at the political level. Solutions are available. This delay in the transition is increasing exponentially the social inequality in Australia and the lack of transparency in the political sector is the biggest barrier! How can the politicians represent the transition needed instead of the lobbyist desires when new "developments" are planned?
- 01:03:50 Shobha Varkey: Time
- 01:03:53 Victoria Collins: Sussan Ley is the Anti Environment Minister!
- 01:04:00 Denise Salvestro: Agree!
- 01:04:06 Rowan Rafferty: The message needs to be "Transition" otherwise, the BS will continue ...
- 01:04:09 Ann Wigglesworth: I agree, I was expected to see national statistics about the population's attitudes to climate change.
- 01:04:17 Wendy Cox: Transition or suffer the fate of the killer chooks
- 01:04:25 Nina Heymanson: If you're interested in jobs transition plans, there a question in Q&A to bump up
- 01:04:31 Noel Willis: Good points Richie!
- 01:04:51 Jay Wilson: At the very least, Minister Chris should at least let Zali co-sponsor his proposed Climate Bill, no?
- 01:04:53 Claire Bettington: ANGUS TAYLOR - 1ST CANDIDATE FOR A FEDERAL ICAC!!!
- 01:05:00 jennifer manson: It's worth remembering that Susan Ley was removed using taxpayer money to travel to Qld to buy a unit for herself. She acts in her own interests not those of the taxpayer.
- 01:05:47 Darryl Fallow: The government won't enact the Safeguard Mechanism! Ask for higher emission levels and it will be granted.
- 01:05:54 Beverley May: A logical proposal Jay. Well said.
- 01:05:57 Anne Heard: Safeguards Policy = no more fossil fuels
- 01:05:59 Jo-Anne Bulmer: The chooks next door just had a bit to say, here on Yugambah country. Just coincidence I'm sure 😊
- 01:05:59 Glenn Atkinson: Grassroots Vote Angus Out movement may just be successful.

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:06:17 Victoria Collins: Australians WILL be paying a Carbon Tax when other countries put tariffs on our goods.
- 01:06:25 Steve Sherry: Bridget McKenzie, another one bought back from Coventry by Morrison.
- 01:06:28 Stephen Young: Why has Ebony avoided asking the top up-voted question "Can we take Labor's policies on climate action seriously as long as the ALP continues to receive donations from fossil fuel interests?"
- 01:06:43 Helen Reynolds: I can hear your chooks again Richie...they are definitely supporting the call for net zero !
- 01:06:52 Allan Evans: Well said Victoria we will pay a tax that goes off shore.
- 01:06:54 Ros Blackwood: Totally Richie
- 01:07:44 Peter Tait: Sorry Chris,
- 01:07:49 Mark Kunach: With the rooftop solar tsunami of installation continuing it is clear many people know the advantages. We could build on that sentiment if we had more aggressive strategies to encourage EV purchases and more options from EV manufacturers. Make EVs cheaper and tax polluting ICE cars. Plus, EV batteries and home solar charging has many advantages. Even better if we manufactured the batteries here.
- 01:08:01 Anne Heard: Oh, yeah, that would be the gas we largely export!!
- 01:08:11 Peter Tait: Actions shout louder than passion ...
- 01:08:12 Claire Bettington: NO FRACKING, EVER! David Suzuki said that Gas fracking is the STUPIDEST industry ever invented. Use CONVENTIONAL gas, not FRACKED gas!
- 01:08:21 Fred Sim: But there is no need to build new gas or coal facilities, just cap existing ones
- 01:08:23 John Knox: Electrifying everything releases fossil gas for use in gas powered stations
- 01:08:26 Diana Beere: But we don't need to extract MORE gas!
- 01:08:32 Rod Holesgrove: Richie — we cannot ignore protecting and restoring green and blue carbon stores - a win win for climate , biodiversity , fresh water etc
- 01:08:32 Allan Evans: No new gas is needed. Australia has a surplus we prioritise exports for profits to the few.
- 01:08:33 Darryl Fallow: Bob Douglas's question not raised either.
- 01:08:38 Felicity: Deniers should be held responsible for the CO2 emissions they are causing and the damage it is causing.

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:08:40 Valerie Boshier: Val Boshier NO one is suggesting turn off coal or gas tomorrow!!!
- 01:08:41 Wendy Cox: Let's support traditional owners
- 01:09:00 Rowan White: "lower carbon" gas give me a break
- 01:09:02 Peter Tait: If mining and extraction can never be taken out, why explore?
- 01:09:03 Jo-Anne Bulmer: I don't buy that Chris.
- 01:09:04 Rhydian Cowley: Lower carbon gas? pfffft
- 01:09:04 Kate Wylie: Gas means more carbon dioxide and more methane in the atmosphere - Labor you have to say no to it across the board. Beetaloo is a mistake
- 01:09:09 Donna Bagnall: Batteries can now do that firming role. No need for gas in the electricity system.
- 01:09:09 Helen Reynolds: You should be opposed to gas exploration !
- 01:09:17 Claire Bettington: What about Fugitive Emissions, even from exploration wells? Methane is such a powerful GHG, far worse than CO2!!!
- 01:09:19 Judith Gamper: from Judith - I have heard/read from reputable sources WE DO NOT NEED MORE GAS!
- 01:09:20 Felicity: We do not need gas now! We have big batteries for instant power.
- 01:09:21 John Englart: Chris is right we will need gas peakers for short to medium term, but that doesn't mean we need any new gas. IEA says we need to stop all new coal, gas projects. Labor still supports gas expansion
- 01:09:22 Sandy Buck: beetaloo involve water tables and destruction of land
- 01:09:25 Jo-Anne Bulmer: I don't buy that Chris. We already have enough gas.
- 01:09:26 Sue Dixon: Please answer the question re Labor accepting donations from fossil fuel companies
- 01:09:31 Kylie McIntosh: Agree Kate Wylie
- 01:09:45 Jenita Enevoldsen: On GAS: Will you commit to turning off subsidies to fossil fuels today Chris, If you are committed to an all electric nation?
- 01:09:47 Rhydian Cowley: lower carbon or not, gas means emissions. We can't have new gas
- 01:09:49 David James: What a cop out on NT fracking. very poor.
- 01:09:54 Alexander Marks: Dividing and conquering indigenous owners is not an admirable strategy

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

01:09:55 Aaron Robinson: You keep coal as you transition. Advocacy for fracking puts you in the same boat as the Libs.

01:10:01 Nick Abel: Chris Bowen says we need gas for the transition to renewables, but most gas produced here is exported and burnt overseas. Stop doing that and we don't need to open new gas fields. Nick

01:10:01 Andrew Holliday: Ebony is risking her street-cred big time by avoiding the key questions...

01:10:01 Sharee McCammon: ALP support of Beetaloo shows that they still serve their fossil fuel donors, not us

01:10:07 Richard Tuffin: Sorry but even allow exploration at Beetaloo is disgraceful>

We should start treating gas like coal and look to remove it asap from our power sources and export markets

01:10:08 Alexander Marks: We should be looking to renewable energy exports in the Northern Territory instead of fracking!

01:10:12 Kylie McIntosh: What is low carbon gas??

01:10:22 Suzanne Rogers: We have global contracts that do not look after Australia's needs as a priority :(

01:10:23 Felicity: NO TO GAS!!!!

01:10:27 Claire Bettington: The Beetrooter et al: the TAIL wagging the DOG

01:10:39 Jo-Anne Bulmer: NO NEW GAS

01:10:43 Barbara Lyle: I fear that the Nats have decided to flex their muscles and are holding Australia to ransom.

01:10:47 Jill Murray: The strength of these responses to continued gas exploration suggest that the current policies might be making Labor less electable than they would otherwise be.

01:10:51 Noel Willis: Don't expect an answer Kylie..

01:10:53 Chris Biggar: Low carbon gas is less CO2 scrubbing required

01:11:00 Stephen Young: Make Labor better. Vote 1 Greens.

01:11:00 Darryl Fallow: Agree about Beetaloo - we don't need this!

01:11:01 Anne Heard: GS = Great Australian Lie

01:11:11 Sharee McCammon: Please ask Chris Bowen if ALP will stop accepting donations from the fossil fuel industry

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:11:13 Anne Heard: Oops, GAS
- 01:11:15 jennifer manson: Fracking risks our water and there's nothing more important than access to water in Australia
- 01:11:17 Joy Pegler: Lower Carbon presumably means higher methane content.
- 01:11:21 Sandy Buck: imagine if all the irrigation channels were covered in solar cells? reduce evap and generate electricity/
- 01:11:23 Sandra Macdonald: Chris Bowen, Labor has to do better on getting rid of gas sooner! I vote Chris!
- 01:11:24 Tam Doan: Hello everyone,I am writing here something that is not in the topic. some politicians make sure that they are chummy with Senior citizens groups. Give Federal money to build a BBQ here and there, zoom talking, come party, Volunteers Appreciation award Certificats, etc. These sweet seniors vote for them because that the names thye have heard their groups mention. All votes are equal, hence they are important. We should tak to any seniors about what we can do for a better climate.e
- 01:11:29 Ros Blackwood: Methane is also part of the problem and I do mean our obsession with beef in our teeth and pork on our fork. Please face this Australia
- 01:11:34 Allan Evans: Narrabri aaags exploration is a disaster in the making.
- 01:11:40 Denise Rawling:so good to see focus on regional australia in these policies - betrayal is not strong enough! lies and fear-mongering by those who should be their leaders. A disgrace.
- 01:11:41 Victoria Collins: 'This is a Solar Panel, Scott, don't be afraid of it!'
- 01:11:57 Darryl Fallow: Will Labor sign up to the Global Methane Pledge??
- 01:12:01 Felicity: WE HAVE MOVED ON FROM GAS.
- 01:12:21 Mark Kunach: We must stop burning coal, gas and oil; the sooner the better for the planet. A clear plan to transition and support the jobs lost, and train for the new ones in the renewables industries.
- 01:12:38 Matthew Ross: has there been a study of what warfare does to the environment and how it will effect climate change given the current events of the region are governments of Australia going to think about this has there been talks on this topics
- 01:12:44 Jo-Anne Bulmer: Traditional owners don't want exploration in the Beetaloo Basin and we don't need new gas. Is the ALP beholden to the gas industry.
- 01:12:47 Beverley May: NO NEW GAS! Not a gas-fired recovery. Take Chris' point that to transition current gas peaker plants will have a place - then ultimately to be retired. SA as a state leading the way to what is possible.

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:13:07 Victoria Collins: Methane is definitely a bigger problem than CO2. We need to acknowledge this. They are both a problem though.
- 01:13:10 Lindsay Ferguson: Dear Tam Doan, please check your ageism. People who don't bother to think about how they dispose their vote occur in all age groups. There are plenty of angry, stirred up Old People who will never vote conservative. I am case in point.
- 01:13:15 Eric Pozza: It's refreshing to hear a Labor pollie speaking straight and strong
- 01:13:20 Darryl Fallow: More Coal and Gas make net-zero by 2050 a fraud!
- 01:13:37 jennifer manson: Tam, you assume seniors are stupid.
- 01:13:38 Suzanne Rogers: Please do not clear trees (the most efficient oxygen creator) and environments for building wind and solar. Surely we can keep our bushlands and ecosystems as well as have renewable energy.
- 01:13:55 Jill Murray: Hydrogen is a gas. Sneaky but not technically untrue.
- 01:14:17 Jen Sinclair: Second that Suznne.
- 01:14:20 Fred Sim: So why do we support fracking and exploration in that area?  
Exploration = new, no?
- 01:14:22 Claire Bettington: Game of Mates: shovelling \$billions of public money to your mates & supporters.
- 01:14:26 Darryl Fallow: Can't argue with you Jill - H2 is a gas (at normal temps of course).
- 01:14:28 Wendy Cox: The chicken in the room is exports
- 01:14:29 Victoria Collins: The Kurri Kurri Gas Fired Power Station is just more pork barreling.
- 01:14:31 Clayton Drury: We have plenty of gas already. Why not reserve some for use here instead of exporting it? We should not be spending any more govt money on new gas infrastructure and discovery.
- 01:14:41 Jo-Anne Bulmer: ALP please declare you DON'T support exploration in
- 01:14:59 Frank Choy: Suzanne, we also need to plant more trees especially natives.
- 01:14:59 Gill King: We can achieve rapid transition that's needed - if have full-on commitment - WW2 and early response to COVID are excellent examples of how much can be achieved in extremely short time.
- 01:15:13 Anne Heard: Retrain the workforce
- 01:15:17 Chris Biggar: We need gas peakers - that is a fact, until they can run Hydrogen. That is what the weather tells us. Chris is spot on. Just having an emotional no gas viewpoint isn't helping.

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:15:34 Jo-Anne Bulmer: ALP supporting exploration in Beetaloo Basin is very suss. We don't new gas mining.
- 01:15:37 Victoria Collins: Agree Chris Biggar.
- 01:15:47 Anne Heard: Chris, domestic reservation policy federally would help
- 01:15:48 Noel Willis: Can we have a Greens climate spokesperson next, please?
- 01:16:02 Gavin Gilchrist: Chris: you were asked about no new coal mines, not whether you'd close existing mines
- 01:16:05 Jock Churchman: Nick is right. Don't export any natural gas! We could export green hydrogen instead.
- 01:16:07 Judith Gamper: fro Judith - excellent point Gill
- 01:16:07 Fred Sim: Someone mentioned yesterday at Poll Position about Nationalising Gas and then reducing it so we have direct control - thoughts?
- 01:16:11 Steve Blume: @Chris Biggar Not true that we need gas peakers.
- 01:16:25 Tam Doan: Lighterfootprints.org is to capign for the protection of Victorian Tall Forest. Please join in to get it happen. Light Footprints ahs been so busy with other tasks that his project has not been able to start. Please visit the website and read the Sept talk. We all need more hands and more minds
- 01:16:26 Donna Bagnall: Agree with Steve Blume.
- 01:16:26 Ros Blackwood: Is the money into investigating project of CFPStation in Collinsville code for the investment cooperations overseas. How criminal that we are involved in this fraud as the Aust public
- 01:16:29 Anne Heard: Fred, I agree
- 01:16:48 Steve Blume: @Chris Biggar and H2 as a fuel is a really bad expensive idea.
- 01:16:50 Wendy Cox: Chris Bowen we don't NEED gas peakers - @Steve Blume
- 01:16:56 Claire Bettington: Can we have Richard Denniss's analysis of the economics of the transition to a decarbonised Australia? Thanks.
- 01:17:06 Victoria Collins: Jobs Rich Renewables Rich. Sounds like a plan.
- 01:17:08 Joy Pegler: Methane in natural gas = 1 carbon atom, ethane = 2, propane = 3 and butane = 4.
- 01:17:18 Nick Gemmell: Need to adopt GREEN Mining! That is - Lithium. copper. etc. Then "manufacture" Lithium Batteries! N

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:17:37 S A Hamed Hosseini: 👉 interestingly the question i raise about the politics behind this was avoided even if it was its turn since 7 min ago! 😞
- 01:17:38 Mark Kunach: What happens to the stranded coal and gas assets when the cost to run the mines/generators becomes uneconomical. Who will pay to remediate these sites? Not the Public!!! We cannot have companies walk away from the mess. We already see some old CSG sites bleeding methane.
- 01:17:38 Steve Blume: Methane in fossil gas in Oz was ~96%
- 01:17:41 Suzanne Rogers: Green roofing too please
- 01:17:49 Anne Heard: Why imagine, Chris? Write the policy!!
- 01:17:50 Peter Sainsbury: yes but the mining and burning of coal kills people and also makes them sick. they are dirty sources of fuel and represent an old way of doing business. by continuing we are saying it is ok for people to get asthma and die
- 01:17:53 Kate Wylie: Thank you Australia Institute
- 01:18:03 Ros Blackwood: Thank you
- 01:18:06 Eric Pozza: thanks all. Great session again. And thanks to Chris.
- 01:18:08 Claire Bettington: Dodged a bullet on the mining donations, Chris!
- 01:18:11 Barry Traill: Thanks TAI- quality event as always
- 01:18:12 Suzanne Rogers: Thank you everyone
- 01:18:15 Tony Simons: Thanks for a great forum.
- 01:18:15 Rhiannon: Thanks to all for joining us today and for participating in the discussion on our most recent Climate of the Nation survey results, and Australia's climate action. You can access the report here: <https://australiainstitute.org.au/report/climate-of-the-nation-2021/>

For details about upcoming webinars and to book head to [https://nb.tai.org.au/webinar\\_series](https://nb.tai.org.au/webinar_series). At the bottom of the page you can also view our previous webinars in full if you missed any – today's webinar has been recorded and will be available at a later date.

Thanks again for joining us!

- 01:18:16 Anne Heard: Thanks all.
- 01:18:16 Frank Freschi: Fantastic talk by Chris B and thanks to TAI again.
- 01:18:16 Mark Kunach: We need to have an ongoing discussion!
- 01:18:18 Fred Engels: Thanks All!!!

**Chatlog is unedited and published in full and doesn't necessarily reflect the views of The Australia Institute**

---

- 01:18:21      Brendan ORegan:      Thanks Chris, Ebony, Ben and Richie!
- 01:18:21      Natalie Charles: Thank you
- 01:18:22      Jay Wilson:      ta everyone!
- 01:18:23      Steve Blume:      Great session AGAIN!
- 01:18:24      Merah Hashmi: Thanks everyone, would have liked to hear an answer to the top question
- 01:18:24      Richard Tuffin: Thanks guys - Chris
- Great panel
- 01:18:25      Fred Sim:      Thanks Chris, Ben, Richie, Ebony and all. Keep the conversations going.
- 01:18:26      John Englart:      Lively chat today, and many questions. Thanks Australia Institute
- 01:18:27      Tricia Hiley:      Thank you. Very informative report.
- 01:18:27      Claire Bettington:      thank youse all!!!
- 01:18:29      Darryl Fallow:      Thanks to TAI!
- 01:18:30      Rhydian Cowley:      Thanks all
- 01:18:30      Victoria Collins: Thank you all.
- 01:18:31      Denise Salvestro:      Thanks to all! Will be good to continue this discussion
- 01:18:31      David Evans:      Excellent presentation. Tku AI.
- 01:18:31      Kenneth Waldron:      good webinar
- 01:18:32      Barbara Norman:      Thanks great presentation and discussion!
- 01:18:35      Sandy Buck:      perhaps chris could answer those Qs and send these out.
- 01:18:36      Angus M Robinson:      Many thanks for the invite :)
- 01:18:37      Audrey Quicke: <https://australiainstitute.org.au/report/climate-of-the-nation-2021/>
- 01:18:39      Leonie Lane:      stimulating, hopeful discussion!!
- 01:18:40      Jody Fassina:      Thanks Chris
- 01:18:42      Matthew Ross:      👍
- 01:18:44      Fred Sim:      Keep pressing on, we need to!
