

A MESSAGE TO WORLD LEADERS // UN MESSAGGIO PER I LEADER INTERNAZIONALI

# DON'T LET AUSTRALIA CHEAT ON CLIMATE CHANGE

NON LASCIATE CHE L'AUSTRALIA IMBROGLI SUL CAMBIAMENTO CLIMATICO

**AUSTRALIA IS NOT TRANSITIONING AWAY FROM FOSSIL FUELS  
IT IS INCREASING ITS DEPENDENCE ON THEM.**

L'Australia non si sta allontanando dalle energie fossili,  
Sta aumentando la sua dipendenza da esse.

Since 2005 Australia's pollution from producing and burning gas and coal has gone up, not down.

Since the Paris climate talks in 2015, Australia has opened the enormous Adani coal mine, become the world's third largest exporter of fossil fuels and funded a so-called 'gas led recovery' to Covid-19.

Dal 2005, l'inquinamento prodotto dall'Australia dalla combustione di gas e carbone sta crescendo, non diminuendo. Dalla Conferenza sul Clima di Parigi nel 2015, l'Australia ha aperto l'enorme miniera di carbone Adani, diventando il terzo esportatore al mondo di combustibile fossile e finanziando un cosiddetto "recupero trainato dal gas" in risposta al Covid-19.

**THE AUSTRALIAN GOVERNMENT IS NOT COMMITTED TO CLIMATE ACTION, IT IS COMMITTED TO FOSSIL FUELS.**

**IL GOVERNO AUTRALIANO NON È IMPEGNATO IN AZIONI PER IL CLIMA, È IMPEGNATO A PROMUOVERE I COMBUSTIBILI FOSSILI.**

Photo above: depicts then-Treasurer now Prime Minister Scott Morrison handing Deputy Prime Minister Barnaby Joyce a lump of coal during Question Time in the House of Representatives at Parliament House in Canberra, 9 February 2017.

<sup>1</sup>Australia measures emissions from the production, processing, transport, storage, transmission and distribution of fossil fuels (coal, crude oil and natural gas) as 'fugitive emissions'. The National Greenhouse Gas Inventory shows that fugitive emissions have increased from 10.2 Mt CO<sub>2</sub>e in March 2005 to 13.4 Mt CO<sub>2</sub>e in March 2021.

The **Australia Institute**  
Research that matters.
